Fire Safety

CSTF, Fire Safety

Total Score: 9, Passing Grade: 7, Version: 4

1. What route should be taken when evacuating your workplace in the event of an emergency? (Select ONE of the following options) (Score: 1)

- The most familiar route
- The route by which you entered the building
- Through a window
- The safest and most direct route

2. When would it be appropriate to smother a fire with a fire blanket? (Select TWO of the following options) (Score: 1)

- When a plug socket starts to smoke
- When a toaster emits flames
- When a persons clothing is on fire
- When a spillage of flammable liquid is on fire

3. Which of the following should you do when there is a fire? (Select FOUR of the following options) (Score: 1)

- Close doors to restrict the spread of fire
- Raise the alarm
- Alert and inform your colleagues in the immediate vicinity
- Use the nearest appropriate fire extinguisher if you have been trained
- Collect all your personal belongings before evacuating the building

4. Which of the following are reasonable means of raising a fire alarm? (Select TWO of the following options) (Score: 1)

- Activating a manual fire alarm call point
- Shouting "Fire" to inform colleagues that there is a fire
- Calling 999
- Putting a message on Facebook

5. What responsibilities do ALL staff have during a fire incident? (Select TWO of the following options) (Score: 1)

- To raise the alarm
- To inform colleagues of the fire
- To evacuate patients from the building
- To use the appropriate fire extinguisher

6. Indicate ways that an electrical fire could start in your workplace: (Select THREE of the following options) (Score: 1)

- Appliances turned off when not in use
- Trapped or pinched electric cables
- Obstructed vents on electrical equipment
- Overloaded extension sockets
- More than one appliance in use
- Discarded cigarette butt

7. A risk assessment has identified blocked fire escape routes. How often should you check your fire escape route? (Select ONE of the following options) (Score: 1)

- Daily
- Weekly
- Monthly
- When you remember
- Never

8. What actions might you take to reduce the risk of a fire occurring and spreading? (Select THREE of the following options) (Score: 1)

- Switch off non-essential electrical appliances
- Remove rubbish and waste materials
- Close all doors
- Turn the lights on

9. Why is a fire which starts at a lower level of a building potentially more hazardous than one starting at a higher level. (Select TWO of the following options) (Score: 1)

- Evacuation routes may have to pass the fire
- Smoke and heat rising through the building may affect escape routes
- Fire alarm will take longer to operate
- The fire service are not equipped to fight fires at lower levels
