Invasive Procedures

CSTF

Total Score: 10, Passing Grade: 8, Version: 8

1. Which of the following are part of the WHO 5 steps and provide opportunities to check the right patient, right operation, right side:

(Select the 3 correct answers) (Score: 1)

Before admission

The Safety Brief

Sign-In

Time-Out

Sign-Out

2. Time-Out should be:

(Select the 3 correct answers) (Score: 1)

Used for all patients prior to the start of the procedure

Done only once the operator is scrubbed and standing at the table

Only when all essential team members have stopped what they are doing

Led by the most senior operator present

Recorded by signing the Time-Out box on the checklist

3. Which of the following are true of the Safety Briefing?

(Select the 3 correct answers)

(Score: 1)

There should be consideration of post operative destination

There should be consideration of any infection risk or special precautions required

It is not part of the original WHO checklist, but is included in the WHO 5 steps as it is strongly supported by evidence

It is the last chance for team members to introduce themselves

It is the last chance to get the right patient, right operation, right side

4. Who must be present as a minimum for all 5 steps?

(Select the 2 correct answers) (Score: 1)

The operator

The radiographer if one case on the list involves the use of fluoroscopy

The most junior anaesthetist present for the list

The most senior member of nursing staff/AHP

A recovery nurse for cases taking place in main theatres

5. In which areas does the Invasive Procedure Policy apply?

(Select the 3 correct answers) (Score: 1)

Interventional radiology

The phlebotomy unit

The operating theatre

A general ward

The endoscopy suite

6. The advantages of adopting the WHO 5 steps to safer surgery include:

(Select one correct answer)

(Score: 1)

It encourages team working

It focuses the entire team on patient safety

It encourages systematic communication

It empowers people to speak out and voice concern

All of the above

7. "The Five Steps" include:

(Select the 3 correct answers)

(Score: 1)

Marking the site in the ward before the patient is transferred to theatres

The Sign-Out before the patient is transferred to recovery

The Safety Briefing at the start of the list

The Safety De-Briefing at the end of the procedural list

Completion of the consent form

8. What are the 3 types of never event?

(Select the 3 correct answers) (Score: 1)

- Wrong site surgery
- Delay to blood products arriving
- Non-availability of a piece of equipment
- Insertion of a wrong prosthesis
- Incorrect swab count resulting in a retained swab

9. Which areas have their own bespoke checklists?

(Select the 3 correct answers)

(Score: 1)

- Interventional radiology
- Endoscopy suites
- The Orthopaedics department
- The Western Eye Hospital
- The private theatres

10. Which old policies/guidelines can be discarded as a result of implementing the 5 steps?

(Select the one correct answer)

(Score: 1)

- The site marking policy
- The consent policy
- The "Preparing a patient for an invasive procedure" policy
- Procedure specific guidelines such as the Intra-ocular lens implantation guideline
- The VTE prophylaxis guidelines
- None of the above
